

THE CLIMATE READY COMMUNITIES PROGRAM

DOES YOUR COMMUNITY NEED TO BUILD CLIMATE RESILIENCE?
ARE YOU HAVING A HARD TIME FIGURING OUT WHERE TO START?
WE CAN HELP.

As the intensity and frequency of hurricanes, floods, droughts, wildfires, heat waves, and other climate-driven disturbances increase, local leaders around the country are realizing they need to build resilience to protect their communities. But many community leaders do not know where to start and they do not have funding to hire a high-priced consultant.

Sound familiar?

To help local leaders build climate resilience in their communities at an affordable cost, the Geos Institute announced its Climate Ready Communities program at the 2017 ICMA annual conference. If you are ready to get started building local climate resilience, ***we invite you to apply to be one of 15 communities that will participate in our pilot program*** starting in March 2018.

ABOUT THE PROGRAM

Climate Ready Communities brings Whole Community Resilience to local governments through an assisted “Do-It-Yourself” approach with 3 elements:

1) Comprehensive climate resilience planning guide for small to medium sized communities (*free*)

2) Subscription service for support (*\$2,499 for year one, \$1,499 per year after that*)

- ✓ Templates for each step
- ✓ Tutorials for each template and key concepts in the Guide
- ✓ Monthly 60 minute, live call-in forum
- ✓ Email support to address technical system issues or basic questions
- ✓ 2 hours of phone consulting per year
- ✓ On-line community forum

3) Additional support services (*\$1k - \$15k*)

- ✓ Blocks of additional consulting time
- ✓ Local climate change projections
- ✓ On-site facilitation, with optional documentation of workshop results
- ✓ Webinars on climate and resilience-related topics

PILOT PROCESS

The Geos Institute completed pre-beta reviews with several communities earlier in 2017 and is in the process of finalizing the Guide and supporting materials. Beta testing will begin in January 2018. The pilot program is scheduled to begin in March 2018 and will run 6 months before the Climate Ready Communities program is made widely available. Pilot communities will pay the standard subscription price (\$2,499), but gain an additional 3 hours of one on one consulting time at no additional cost (for a total of 5 hours of consulting).

APPLY TO BE A PILOT COMMUNITY

Communities may apply to participate in the pilot program through February 28, 2018 by visiting www.ClimateReadyCommunities.org/pilot. The Geos Institute will select 15 applicants that best represent the diversity of small to medium sized communities across the US and Canada, and will inform applicants by March 10, 2018.

ABOUT US

Our goal is to ***ensure that communities of all sizes in the US and Canada have effective climate resilience programs*** in place to protect their people, natural resources, economy, infrastructure, and culture.

GEOS
INSTITUTE

Over the past 10 years of helping communities understand and adapt to changing climate conditions, our team has developed a proven planning framework known as ***Whole Community Resilience*** - a cross-sector, multi-stakeholder approach that is adaptive over time and creates multiple benefits across the community.

The framework aims to not only develop a plan, but also to strengthen local adaptive capacity, which ensures that communities have the skills necessary to update their climate resilience plans over time.

This framework has been tested in Oregon, California, Colorado, and Montana and is now being offered to communities across North America.
